Dental degree: Ankara University, 2009
Prosthodontist since: 2013
Based in: Adana, Türkiye
PhD in Prosthodontics: Başkent University, 2013
Languages: Turkish, English
Practice: Private dental clinic, Adana

PROFILE

Dr. Dt. Başak Tükel is a prosthodontist – a dentist who has completed specialist doctoral training in restoring and replacing teeth with crowns, veneers, bridges and implant restorations. She completed her PhD in Prosthodontics at Başkent University, where her doctoral research focused on the colour and masking ability of zirconia restorations. She has worked in private practice and in a Ministry of Health oral and dental health hospital, and since 2022 has run her own dental clinic in Adana. She plans and carries out treatment herself, from the first assessment to the final restorations, including implant placement.

AREAS OF PRACTICE

- Smile design and Hollywood smile planning
- Laminate and E-max veneers
- Zirconium and E-max crowns and bridges
- Dental implants, including All-on-4 and All-on-6 full-arch treatment
- Teeth whitening and professional cleaning
- Restorative and root canal treatment
